TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, Java, C#, SQL

Web Development: HTML, CSS, React, Bootstrap, Tailwind CSS

Backend & API Development: Django, Node.js

Database System: MongoDB, PostgreSQL

Design & Prototyping: Figma

Game Development: Godot Engine v4

PROJECTS

KiEdVibe | *HTML, CSS, JavaScript, Django, Figma*

2025

- Sole developer — independently architected, designed, and deployed a full-stack YouTube-inspired platform tailored for children, covering UI/UX design, frontend, and backend from scratch.
- Engineered a parent-child monitoring system allowing parents to track viewing activity and control content access, prioritizing child safety and parental oversight.
- Designed an engaging, child-friendly interface in Figma and implemented it end-to-end with HTML, CSS, JavaScript, and a Django backend.

SUGO – SOFTFEST 2025 | *Godot Engine v4*

2025

- Conceived and authored the entire storyline and game concept, grounding the game in Filipino culture (specifically *Bicol* culture) to create a meaningful and distinctive player experience. Portrays the life of a *Bicolano* kid who suffers from mental health problems due to the loss of his parent, and now gets to live life in his own kind of world.
- Hand-designed every in-game sprite from scratch, giving SUGO a wholly original visual identity without reliance on external asset packs.
- Collaborated with team members on game logic and level design to deliver a polished, playable experience — earning 2nd Place Overall at the Software Festival 2025 (Ateneo Arts & Algorithm Festival, Oct 13–14, Xavier Hall).

Daily Mood Tracker App | *Figma*

2025

- Designed a complete mobile UI/UX prototype for a daily emotional wellbeing app, covering end-to-end user flows, wireframes, and high-fidelity screens.
- Crafted a cohesive gradient-forward visual identity with mood logging, history viewing, and account management screens optimized for ease of daily use.

Skwater | *Godot Engine v4*

2024

- Independently conceived the full game concept, original storyline, and level design for a 2D platformer rooted in Filipino culture — portraying the lived realities of marginalized urban communities with narrative authenticity and cultural grounding.
- Collaborated with team members on game logic design and implementation in Godot Engine v4, translating creative direction into a cohesive and playable experience.
- Marks as the team's first full game submission and establishing the foundation for the group's continued work in culture-driven game development.

Hogwarts Hidden Library Management System | *C++*

2024

- Designed and built a fully object-oriented library system in C++ with complete CRUD operations — add/remove books, register/remove users, and borrow/return workflows with real-time availability tracking.
- Implemented intelligent data integrity constraints: prevents removal of users with active loans, blocks borrowing of already-borrowed books, and disallows removal of unreturned books — eliminating invalid system states.
- Persisted all library data to file storage and enriched the terminal UX with ANSI color-coded output, making the CLI interface readable and intuitive.

Dovetail Social Platform | *Figma*

2024

- Produced a full UI/UX design prototype for a social networking platform, delivering a structured component system, consistent design language, and high-fidelity interaction flows.
- Focused on intuitive navigation architecture and a refined visual identity to create a platform experience that is both familiar and distinctly engaging.

CERTIFICATIONS

Introduction to Programming

Foundations of UI/UX Design

Machine Learning and Applications

Trends in Application Development

EDUCATION

Ateneo de Naga University

Bachelor of Science in Computer Science

Naga City, Camarines Sur, PH

2023 – Present

- **QPI:** 3.014/4.0
- **Coursework:** Data Structure and Algorithms, Object-Oriented Programming, Software Engineering, Machine Learning, Systems Administration and Maintenance, Information Management, Work Ethics, UI/UX Design, Web Development, Game Development

Ateneo de Naga University

Bachelor of Science in Computer Engineering

Naga City, Camarines Sur, PH

2020 – 2023

- **QPI:** 2.982/4.0

University of Saint Anthony

Science, Technology, Engineering, and Mathematics (STEM)

Iriga City, Camarines Sur, PH

2018 – 2020

- Graduated With High Honors

ACHIEVEMENTS

2nd Place, Software Festival 2025 — SUGO

October 2025

- Awarded 2nd Place Overall among the best projects at the Software Festival 2025 during the Ateneo Arts and Algorithm Festival.
- Presented SUGO, a culture-based 2D platformer game developed in Godot Engine v4 with original hand-designed sprites.

Academic Honors

March 2021

- Received College Honors for both the 1st and 2nd semesters of school year 2020–2021 with a GPA of 3.40 at ADNU.
